

**Board of Trustees
Douglas County School District**

PROGRAMS

WELLNESS

The Douglas County School District promotes healthy schools by supporting wellness, good nutrition, and regular physical activity as part of the total learning environment. The District assures a healthy environment where children learn and participate in positive dietary and lifestyle practices. By facilitating learning through the support and promotion of good nutrition and physical activity, schools contribute to the basic health status of children as well as maximizing their learning abilities. Good health optimizes student academic performance, which contributes to all children reaching their highest potential as productive, responsible citizens.

The Board of Trustees will direct the administration to periodically review and revise the wellness regulations including curriculum, nutritional guidelines for all foods available on district campuses during the school day, physical activity, and school based activities.
